Thoughts on ibcm:

I thought that it was supposed to be an easy task to only deal with numbers and code in a simpler environment at first. There are only 16 combinations of code that we can use and it is great. I was super confident when I did the addition assignment. But I had to go through lots of ups and downs to complete the max and bubble sort ones. It seems that coding in ibcm is not fun for me anymore. I have no suggestion for the simulator it works fine. I hope assembly is easier than ibcm. Please be.
